

Success Story: Creating presentation materials, teaching, public speaking, electronic technology

## How to Close the Science, Technology, Engineering and Math Skills Gap

**Employees  
lack basic  
skills\***

Industry executives are concerned about the “skills gap” in today’s workforce. Companies are struggling to find technical talent, in multiple industries, markets and countries.

**But what if individuals did this technical training on their own, and for free?**

***Encouraged 1,000s of children, parents and teachers over the last 5 years to gain interest in electronic technology by creating and demonstrating easy to understand radio experiments.***
